## What is SPL Solution?

SPLCo Ltd is an Emirati owned company that provides software solution and consultancy services to assist global corporations and governments to efficiently modernize their existing software and migrate it to the latest and best software platforms.

## Market Opportunity

The target market for SPL tool is primarily enterprises and government organizations that create custom built software (either in-house or outsourced). Market size of custom-build software is estimated to be **+120B\$, 50B\$** is the global spend on software modernization activities. The digital transformation evolution push for the market growth.

## How it works?

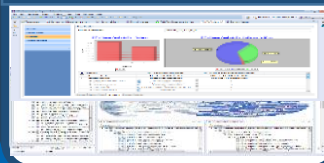

SPLCo created smart tools that automate many of the steps required to upgrade legacy code. This dramatically reduces the cost and time to add new functionality, integrate with third-party and migrate code to modern platforms, like the cloud.

**1** Artificial intelligent analysis to recover system design.
