

Software Product Line

***SOFTWARE MODERNIZATION
AND
MIGRATION SOLUTION***

***SPL makes you ready for digital
transformation***

ADOPT EMERGING TECHNOLOGY & DELIVER BUSINESS AGILITY

SPL provides software modernization services, for medium to large corporations, reducing the high cost of transforming software systems to Cloud and Mico-Service Architecture

- **Accelerating digital transformation:** Application modernization is driven by the need to transform business to build capabilities and deliver them quickly.
- **Improving developer productivity:** Adopting cloud-native and containerization technology enables self service for developers.
- **Improving operational efficiency and standardization.**

SPL MODERNIZATION SERVICE

RISK ASSESSMENT

Assessment report on
transformation
applicability and
recommendation

MODERNIZE

SPL Toolset, and expert
to execute the
transformation strategy

MANAGE

SPL Toolset for
continuance Delivery
and governance

SPL MODERNIZATION SERVICE

RISK ASSESSMENT

Assessment

- Applications evaluated based on business needs
- Potential issues and migration complexity assessments

Strategic Planning

- Identification of key applications that require replacement or upgrade
- Estimated effort for resolving migration issues
- Recommendations for a modernization path

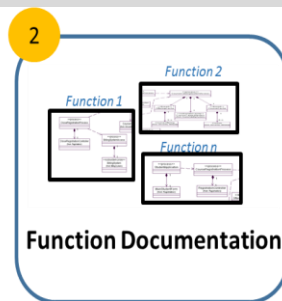

SPL MODERNIZATION SERVICE

MODERNIZE

SPL Toolsets for migration and continece analysis

- Business Function Identification
- Traceability across Business Function
- Code Partitioning & Versioning
- Change Impact Analysis
- Complexity Measurement
- Core Software Units Identification
- Integration & Refactoring Points Identification

SPL MODERNIZATION SERVICE

SPL Continuance Delivery (Future)

- DevOps Integration
- Automatic Cloud-Transformation & Deployment
- Quality Assessment
- Regression Testing Automation
- Reference Architecture Live Documentation

SPL SERVICES BUSINESS VALUE

Speed the Implementation of Digital Transformation Strategy within
your Organization by 30%

Legacy code
analysis and
documentation in
Mins

Reduce
manpower by
80%

Our SPL Solution

SPL : AI Platform For Analyzing Software Systems

“**Agile & easy** integration software solution which provides insight into legacy code and increase your software upgrading efficiency to cloud and micro-service architecture”

Distribution Model

SPL-license

SPL-as-a-Service

Target sector

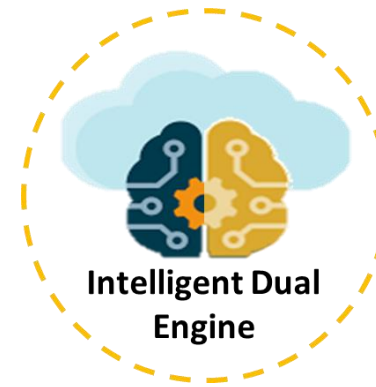

SPL TOOLSET

SPL Insight

Architecture Recovery & Documentation Extraction

SPL Governance

Modernization Analysis and Micro-Service Migration Services

SPL Solution Applications

Cloud Migration

33% of project are follow Lift & Shift strategy

Software Maintenance

72% of IT spending on upgrading or integrating existing functionalities

Software Auditing

100% enterprises should audit quality and vulnerability of their outsourced software

Traction

Trials and used by British Telecom and EBTIC

Achievement:

- Granted by UAE AI Ministry the AI Seal
- Novel and unique mining techniques developed
- 300K AED Grant Received: Khalifa Innovation Center Grant for Technology Exploitation received
- Two Patents are in filling process
- Participated in International conference
- International recognition
 - IET Award Finalist
 - Won Global Telecom Award GTB,

GTB Winner. Panel commented:

“Very innovative and unique entry. If SPL does what it claims it will have a real impact on software quality, time to market and maintenance costs”

SPL TOOLSET USERS

SPL BT Trials

SPL Solution is currently used by BT software development warehouse & R&D lab

Feedback:

“SPL solution helps in planning and study the complexity of migrating monolithic application to micro-service architecture”

“SPL helps in validation software architecture and documenting our code based”

“40% is an estimation of potential applications for cost saving that SPL solution can assist with”

Summary BT Trial

1. Multi-Level Business Component identification

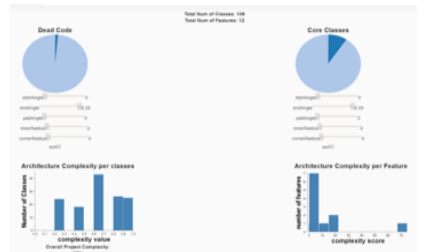

2. Software components Semantic Clustering

3. Software Architecture Visualization

1. Business Component Ranking/ Filtering

2. Quality (Complexity, Dead Code)

3. External Library (security flaw)

1. Business component partitioning

2. Integration Points

3. Shared/common Codebase

Analysis Speed

BT Trial : BT Field-Optimization Project—+100K line code

Code Analysis/Synthesis Duration - automatic : 15 min

Analysis output

- 1. Micro-services Functions:** 80% of the identified functions in both projects can be considered as micro-services.
- 2. Functional Coup Architecture Description:** Each identified functions can be visualised as tree/radial.
- 3. coupling :** very Low, very modular monolithic application.
- 4. Complexity Measurement:** Low, 30% of the classes are highly connected with each other.
- 5. Dead Code:** 6% of the code-based.
- 6. Reusable Code:** 10%
- 7. External library:** Latest
